

FEDERAL ASSEMBLY OF THE RUSSIAN FEDERATION

COUNCIL OF THE FEDERATION COMMITTEE ON ECONOMIC POLICY

29 November 2021

№ 3.6 – 24/3456

To participants and organisers of the 2nd International Congress and Exhibition Polymers of Russia and
CIS: Construction and Modernisation of Plants

Dear Congress participants and organisers!

On behalf of the Council of the Federation Committee of Economic Policy and on my behalf, I greet the participants and guests of the 2nd International Congress and Exhibition Polymers of Russia and CIS: Construction and Modernisation of Plants!

The Russian polymer industry has huge potential for growth. Our producers are capable to not only cover the domestic demand for quality products, but also to occupy the leading positions on the global market. We have every possibility for this: skilled labour, advanced technologies, huge resources – we must make the best out of these competitive advantages.

Being the platform for multilateral dialogues and discussion of the challenges related to construction and modernisation of production capacities, the Congress will facilitate not only better efficiency of development of the petrochemical projects, but also economic development of regions where these projects develop.

I am sure that the event which spans the leaders in the field of polymer production and processing from Russia and the CIS, along with the leading industry experts, will allow to find a new vision for further industry development. I wish the participants and organisers of the Congress the success, good health, and well-being!

Chairman of the Council of the Federal Committee on Economic Policy

Andrei Kutepov
